MULTIWALL

Plant Guards

Extra-Protection for Faster, Taller Plant Growth

Plant Guard Shields from Polygal, effectively protect newly-planted grapevine and tree seedlings, creating a nurturing, natural environment for accelerated plant growth.

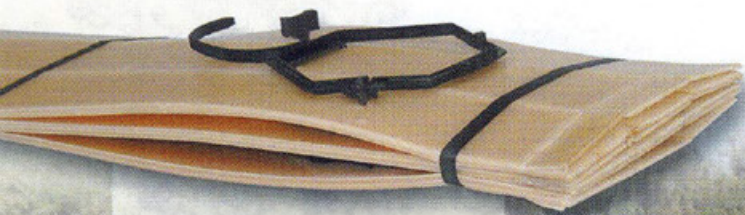

Plant Guard offers Seedling Protection with added advantages:

- Plant shields create a mini-greenhouse effect around the seedling, which significantly enhances rooting and speeds up vertical growth.
- Translucent material transmits light to the seedling.
- Plant shields ensure long growth life in original planting location – no need to transplant.
- Especially effective for rehabilitation of areas damaged by construction, fire, etc.
- Protection from pest and animal damage.
- Protection from herbicides.
- Resistant to UV damage.
- Sturdy and durable for years of service life.
- Cost efficient to install and maintain.

When you choose **Plant Guard**, you'll benefit from Polygal's extensive experience in advanced agricultural solutions, as well as dedicated professional support from Polygal's Agricultural Products Department.

Plant Guard – Extra Protection That Makes All the Difference

These suggestions and data are based on information we believe to be reliable. They are offered in good faith, but without guarantee, as conditions and methods of use are beyond our control. We recommend that the prospective user determines the suitability of our materials and suggestions before adopting them on a commercial scale.
